

ORC-AC-S1

ITEM NO: 12526

The Orcomm Access Control Software Suite is designed for seamless management of your access control system. It allows you to configure, monitor, and manage users and permissions from a single interface. All configurations are uploaded to individual door controllers, ensuring complete system isolation in case of power or software malfunctions. The software can be easily installed on a site manager's PC or on a central server, supporting multi-user management. It provides real-time information as well as access to stored controller data.

In Control Of Your System:

- Multi User
- Overview Map Interface
- Real Time Door Activities
- Real Time Alarm Activation
- Full Remote Door Control
- Alarm System Input
- Multiple Time and Day Schedules
- Card Access Validation
- Anti-Pass Back
- Lift Access and Control Using ORC-LFT Modules
- CCTV Integration (camera module dependent)
- Door Monitoring
